## TacoIneston \& Morley CE Primary Academies Federation

As each has received a gift, use it to serve one another, as good stewards of God's varied grace
1 Peter 4:10
Work together, learn together, grow together...

## Calculation Policy - KS1

The following pages show the Power Maths progression in calculation that we have adopted (addition, subtraction, multiplication and division) and how this works in line with the National Curriculum. The consistent use of the CPA (concrete, pictorial, abstract) approach across Power Maths helps children develop mastery across all the operations in an efficient and reliable way. This policy shows how these methods develop children's confidence in their understanding of both written and mental methods.

| Year 1 |  |  |  |
| :---: | :---: | :---: | :---: |
|  | Concrete | Pictorial | Abstract |
| Year 1 <br> Addition <br> Counting and adding more | Children add one more person or object to a group to find one more. | Children add one more cube or counter to a group to represent one more. <br> One more than 4 is 5 . | Use a number line to understand how to link counting on with finding one more. <br> One more than 6 is 7. <br> 7 is one more than 6. <br> Learn to link counting on with adding more than one. $5+3=8$ |
| Understanding part-part-whole relationship | Sort people and objects into parts and understand the relationship with the whole. <br> The parts are 2 and 4. The whole is 6. | Children draw to represent the parts and understand the relationship with the whole. <br> The parts are 1 and 5. The whole is 6. | Use a part-whole model to represent the numbers. $6+4=10$ $6+4=10$ |
| Knowing and finding number bonds within 10 | Break apart a group and put back together to find and form number bonds. | Use five and ten frames to represent key number bonds. | Use a part-whole model alongside other representations to find number bonds. Make sure to include examples where one of the parts is zero. |

| Aaaing the 1s | Children use bead strings to recognise how to add the 1 s to find the total efficiently. $\begin{aligned} & 2+3=5 \\ & 12+3=15 \end{aligned}$ | Children represent calculations using ten frames to add a teen and 1 s . $\begin{aligned} & 2+3=5 \\ & 12+3=15 \end{aligned}$ | Children recognise that a teen is made from a 10 and some 1s and use their knowledge of addition within 10 to work efficiently. $3+5=8$ <br> So, $13+5=18$ |
| :---: | :---: | :---: | :---: |
| Bridging the 10 using number bonds | Children use a bead string to complete a 10 and understand how this relates to the addition. <br> 7 add 3 makes 10. <br> So, 7 add 5 is 10 and 2 more. | Children use counters to complete a ten frame and understand how they can add using knowledge of number bonds to 10 . | Use a part-whole model and a number line to support the calculation. $9+4=13$ |
| Year 1 <br> Subtraction <br> Counting back and taking away | Children arrange objects and remove to find how many are left. <br> 1 less than 6 is 5 . <br> 6 subtract 1 is 5 . | Children draw and cross out or use counters to represent objects from a problem. q - $\square$ $=$ $\square$ <br> There are $\square$ children left. | Children count back to take away and use a number line or number track to support the method. $9-3=6$ |

| rinaing a missing part, given a whole and a part | Children separate a whole into parts and understand how one part can be found by subtraction. $8-5=?$ | Children represent a whole and a part and understand how to find the missing part by subtraction. $5-4=\square$ | Children use a part-whole model to support the subtraction to find a missing part. $7-3=?$ <br> Children develop an understanding of the relationship between addition and subtraction facts in a part-whole model. |
| :---: | :---: | :---: | :---: |
| Finding the difference | Arrange two groups so that the difference between the groups can be worked out. <br> 8 is 2 more than 6. <br> 6 is 2 less than 8. <br> The difference between 8 and 6 is 2 . | Represent objects using sketches or counters to support finding the difference. $5-4=1$ <br> The difference between 5 and 4 is 1 . | Children understand 'find the difference' as subtraction. $10-4=6$ <br> The difference between 10 and 6 is 4 . |

| subtraction within 20 | Understand when and how to subtract 1s efficiently. <br> Use a bead string to subtract 1s efficiently. $\begin{gathered} 5-3=2 \\ 15-3=12 \end{gathered}$ | Understand when and how to subtract 1s efficiently. $\begin{aligned} & 5-3=2 \\ & 15-3=12 \end{aligned}$ | Understand how to use knowledge of bonds within 10 to subtract efficiently. $\begin{aligned} & 5-3=2 \\ & 15-3=12 \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Subtracting 10s and 1s | For example: 18-12 <br> Subtract 12 by first subtracting the 10 , then the remaining 2. <br> First subtract the 10, then take away 2. | For example: 18-12 <br> Use ten frames to represent the efficient method of subtracting 12. <br> First subtract the 10, then subtract 2. | Use a part-whole model to support the calculation. $\begin{aligned} & 19-14 \\ & 19-10=9 \\ & 9-4=5 \end{aligned}$ <br> So, $19-14=5$ |
| Subtraction bridging 10 using number bonds | For example: 12-7 <br> Arrange objects into a 10 and some 1s, then decide on how to split the 7 into parts. <br> 7 is 2 and 5 , so I take away the 2 and then the 5 . | Represent the use of bonds using ten frames. <br> For 13 - 5, I take away 3 to make 10, then take away 2 to make 8. | Use a number line and a part-whole model to support the method. $13-5$ |
| Year 1 <br> Multiplication <br> Recognising and making equal groups | Children arrange objects in equal and unequal groups and understand how to recognise whether they are equal. | Children draw and represent equal and unequal groups. $\begin{array}{ccc} \text { A } 00 & 0 & 0 \\ 0 & 0 & 0 \\ & 0 & \Delta \\ & \Delta \Delta & \Delta \Delta \end{array} \Delta$ | Three equal groups of 4. Four equal groups of 3. |

|  | T O <br> 100  <br> 100  <br> 100  <br> 100  <br>  0 <br>   |  | This can be represented horizontally or vertically.$34+5=39$$T$ $O$ <br> 3 4 <br> + 5 <br>  9 |
| :---: | :---: | :---: | :---: |
| Adding a 1-digit number to a 2-digit number bridging 10 | Complete a 10 using number bonds. <br> $+$ <br> There are 4 tens and 5 ones. <br> I need to add 7. I will use 5 to complete a 10, then add 2 more. | Complete a 10 using number bonds. | Complete a 10 using number bonds. $\begin{aligned} & 7=5+2 \\ & 45+5+2=52 \end{aligned}$ |
| Adding a 1-digit number to a 2-digit number using exchange | Exchange 10 ones for 1 ten. | Exchange 10 ones for 1 ten. | Exchange 10 ones for 1 ten. |
| Adding a multiple of 10 | Add the 10s and then recombine. | Add the 10s and then recombine. | Add the 10s and then recombine. |

| to a <-digit number | 27 is 2 tens and 7 ones. <br> 50 is 5 tens. <br> There are 7 tens in total and 7 ones. <br> So, $27+50$ is 7 tens and 7 ones. |  | $\begin{aligned} & 37+20=? \\ & 30+20=50 \\ & 50+7=57 \\ & 37+20=57 \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Adding a multiple of 10 to a 2-digit number using columns | Add the 10s using a place value grid to support. <br> 16 is 1 ten and 6 ones. <br> 30 is 3 tens. <br> There are 4 tens and 6 ones in total. | Add the 10 s using a place value grid to support. <br> 16 is 1 ten and 6 ones. <br> 30 is 3 tens. <br> There are 4 tens and 6 ones in total. | Add the 10s represented vertically. Children must understand how the method relates to unitising of 10 s and place value. $\begin{aligned} & 1+3=4 \\ & 1 \text { ten }+3 \text { tens }=4 \text { tens } \\ & 16+30=46 \end{aligned}$ |
| Adding two 2-digit numbers | Add the 10s and 1s separately. | Add the 10s and 1s separately. Use a part-whole model to support. $\begin{aligned} & 11=10+1 \\ & 32+10=42 \\ & 42+1=43 \\ & 32+11=43 \end{aligned}$ | Add the 10s and the 1s separately, bridging 10s where required. A number line can support the calculations. $17+25$ |

|  | $3+2=5$ There are 5 tens in total. $35+23=58$ |  |
| :---: | :---: | :---: |
| Adding two <br> 2-digit <br> numbers using <br> a place value grid | Add the 1 s . Then add the 10 s . | Add the 1 s . Then add the 10 s . $\begin{array}{r\|r} \mathrm{T} & \mathrm{O} \\ \hline 3 & 2 \\ +1 & 4 \\ \hline & 6 \\ \hline \end{array}$ |
| Adding two 2-digit numbers with exchange | Add the 1s. Exchange 10 ones for a ten. Then add the 10s. | Add the 1s. Exchange 10 ones for a ten. Then add the 10s. $+\begin{array}{\|c\|c} \hline & 0 \\ \hline 3 & 6 \\ 2 & 9 \\ \hline 6 & 5 \\ \hline & 1 \end{array}$ |

| rear 2 <br> Subtraction | Use known number bonds and unitising to subtract multiples of 10 . | Use known number bonds and unitising to subtract multiples of 10. |  | Use known number bonds and unitising to subtract multiples of 10 . |
| :---: | :---: | :---: | :---: | :---: |
| Subtracting multiples of 10 | $\otimes \otimes \not \Delta \not \subset \phi \phi \not \subset \not \subset \not \subset$ <br> 8 subtract 6 is 2 . <br> So, 8 tens subtract 6 tens is 2 tens. | $10-3=$ <br> So, 10 te | 100  <br>  30 <br> subtract 3 tens is 7 tens. | 7 tens subtract 5 tens is 2 tens. $70-50=20$ |
| Subtracting a single-digit number | Subtract the 1s. This may be done in or out of a place value grid. | Subtract of a plac | e 1s. This may be done in or out value grid. | Subtract the 1s. Understand the link between counting back and subtracting the 1s using known bonds. $\begin{array}{rr} \mathrm{T} \quad 0 \\ \hline 3 & \\ -\quad 3 \\ \hline 3 & 6 \\ y & 9-3=6 \\ 39-3=36 \end{array}$ |
| Subtracting a single-digit number bridging 10 | Bridge 10 by using known bonds. $35-6$ <br> I took away 5 counters, then 1 more. | Bridge 10 $35-6$ <br> First, I will | by using known bonds. <br> subtract 5, then 1. | Bridge 10 by using known bonds. $\begin{aligned} & 24-6=? \\ & 24-4-2=? \end{aligned}$ |
| Subtracting a single-digit | Exchange 1 ten for 10 ones. This may be done in or out of a place value grid. | Exchang | 1 ten for 10 ones. | Exchange 1 ten for 10 ones. |

| value and columns | T 0 <br> .88300 $00 \not \varnothing \varnothing$ <br> 8830 $\varnothing \varnothing \varnothing \varnothing$ <br> 8280 $38-16=22$ |  | $\begin{array}{r\|r\|} \mathrm{T} & \mathrm{O} \\ \hline 4 & 5 \\ -1 & 2 \\ \hline & 3 \\ \hline \mathrm{~T} & \mathrm{O} \\ \hline 4 & 5 \\ -1 & 2 \\ \hline 3 & 3 \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: |
| Subtracting a 2-digit number with exchange |  | Exchange 1 ten for 10 ones. Then subtract the 1 s . Then subtract the 10 s . | Using column subtraction, exchange 1 ten for 10 ones. Then subtract the 1 s . Then subtract the 10 s . |
| Year 2 Multiplication | Recognise equal groups and write as repeated addition and as multiplication. | Recognise equal groups using standard objects such as counters and write as repeated addition and multiplication. | Use a number line and write as repeated addition and as multiplication. |

| rqual groups and repeated addition | 3 groups of 5 chairs 15 chairs altogether | 3 groups of 5 15 in total | $\begin{aligned} & 5+5+5=15 \\ & 3 \times 5=15 \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| Using arrays to represent multiplication and support understanding | Understand the relationship between arrays, multiplication and repeated addition. <br>  <br> 4 groups of 5 | Understand the relationship between arrays, multiplication and repeated addition. <br> 4 groups of 5 ... 5 groups of 5 | Understand the relationship between arrays, multiplication and repeated addition. $5 \times 5=25$ |
| Understanding commutativity | Use arrays to visualise commutativity. <br> I can see 6 groups of 3 . <br> 1 can see 3 groups of 6 . | Form arrays using counters to visualise commutativity. Rotate the array to show that orientation does not change the multiplication. <br> This is 2 groups of 6 and also 6 groups of 2 . | Use arrays to visualise commutativity. $\left\lvert\, \begin{aligned} & 4+4+4+4+4=20 \\ & 5+5+5+5=20 \\ & 4 \times 5=20 \text { and } 5 \times 4=20 \end{aligned}\right.$ |
| Learning $\times 2$, $\times 5$ and $\times 10$ table facts | Develop an understanding of how to unitise groups of 2,5 and 10 and learn corresponding times-table facts. | Understand how to relate counting in unitised groups and repeated addition with knowing key times-table facts. | Understand how the times-tables increase and contain patterns. |

|  | $\begin{aligned} & 3 \text { groups of } 10 \ldots 10,20,30 \\ & 3 \times 10=30 \end{aligned}$ | $0000000000$ <br> 0000000000 <br> 0000000000 $\begin{aligned} & 10+10+10=30 \\ & 3 \times 10=30 \end{aligned}$ |  |
| :---: | :---: | :---: | :---: |
| Year 2 Division <br> Sharing equally | Start with a whole and share into equal parts, one at a time. <br> 000000000000 <br> 12 shared equally between 2. They get 6 each. | Represent the objects shared into equal parts using a bar model. <br> 20 shared into 5 equal parts. <br> There are 4 in each part. | Use a bar model to support understanding of the division. $18 \div 2=9$ |

| vrouping equally | Understand how to make equal groups from a whole. <br>  $\square$ <br>  $\square$ $\square$ <br> 8 divided into 4 equal groups. <br> There are 2 in each group. | Understand the relationship between grouping and the division statements. $12 \div 3=4$ $12 \div 4=3$ $12 \div 6=2$ $12 \div 2=6$ | Understand how to relate division by grouping to repeated subtraction. <br> There are 4 groups now. <br> 12 divided into groups of 3 . $12 \div 3=4$ <br> There are 4 groups. |
| :---: | :---: | :---: | :---: |
| Using known times-tables to solve divisions | Understand the relationship between multiplication facts and division. <br> 4 groups of 5 cars is 20 cars in total. 20 divided by 4 is 5 . | Link equal grouping with repeated subtraction and known times-table facts to support division. <br> 40 divided by 4 is 10 . <br> Use a bar model to support understanding of the link between times-table knowledge and division. | Relate times-table knowledge directly to division. $\begin{aligned} & 1 \times 10=10 \\ & 2 \times 10=20 \\ & 3 \times 10=30 \\ & 4 \times 10=40 \\ & 5 \times 10=50 \\ & 6 \times 10=60 \\ & 7 \times 10=70 \\ & 8 \times 10=80 \end{aligned}$ <br> I used the IO times-table to help me. $3 \times 10=30$ <br> I know that 3 groups of 10 makes 30 , so I know that 30 divided by 10 is 3 . $3 \times 10=30 \text { so } 30 \div 10=3$ |
